Lab Overview

In this lab, you'll learn how to transform business communications from basic outbound messaging to sophisticated omnichannel experiences. Through practical examples, you'll create a customer journey that combines proactive outreach with responsive engagement.

The Story

SecurFinancial is a fictional bank offering a wide range of financial products and services, including checking accounts, loans, and credit cards.

Objective:

SecurFinancial aims to significantly increase the number of customers using its mobile app to enhance customer satisfaction and retention. By expanding mobile app usage, the bank hopes to reduce operational costs, streamline processes, and provide personalized services using data insights. This strategy will differentiate SecurFinancial from competitors, attract new customers, and reach underbanked populations, driving growth and improving market position. Ultimately, increasing mobile app adoption will reinforce SecurFinancial's commitment to innovation and superior customer experience.

Your Role:

You have been hired by SecurFinancial to help boost mobile app usage. You have been asked to implement a new onboarding experience with Adobe Journey Optimizer for new customers who have just opened a checking account.

The journey includes a series of personalized communications, starting with a warm welcome email or SMS, depending on the customer's communication preferences, as well as a notification on the website that introduces the customer to the mobile app with a call to action to download and install the app. Once the app has been installed the customer will receive a push notification incentivizing them to use the app.

Your challenges:

- SecurFinancial has provided you with brand guidelines, but the email marketing specialists are currently not available, so you will need to compose a compelling email message.
- You need to make sure that only customers who have not already installed the app are asked to install it. Anyone who already has the app installed should only receive a general welcome message.
- You have several approaches for the push message in mind but are not sure which one will be most efficient. You want to make sure the most effective message is sent.
- You would like to continue the onboarding experience in the mobile app as well, without being intrusive.

Prerequisites

- Know your seat number: You can find your seat number on the lab machine's desktop
- You require access to:
 - [Adobe Journey Optimizer](#)
 - [SecurFinancial Website](#)
 - [Summit Lab 535 Cheat Sheet](#), which has all the text and links to copy and paste.

Lesson 1 – Experience the Journey

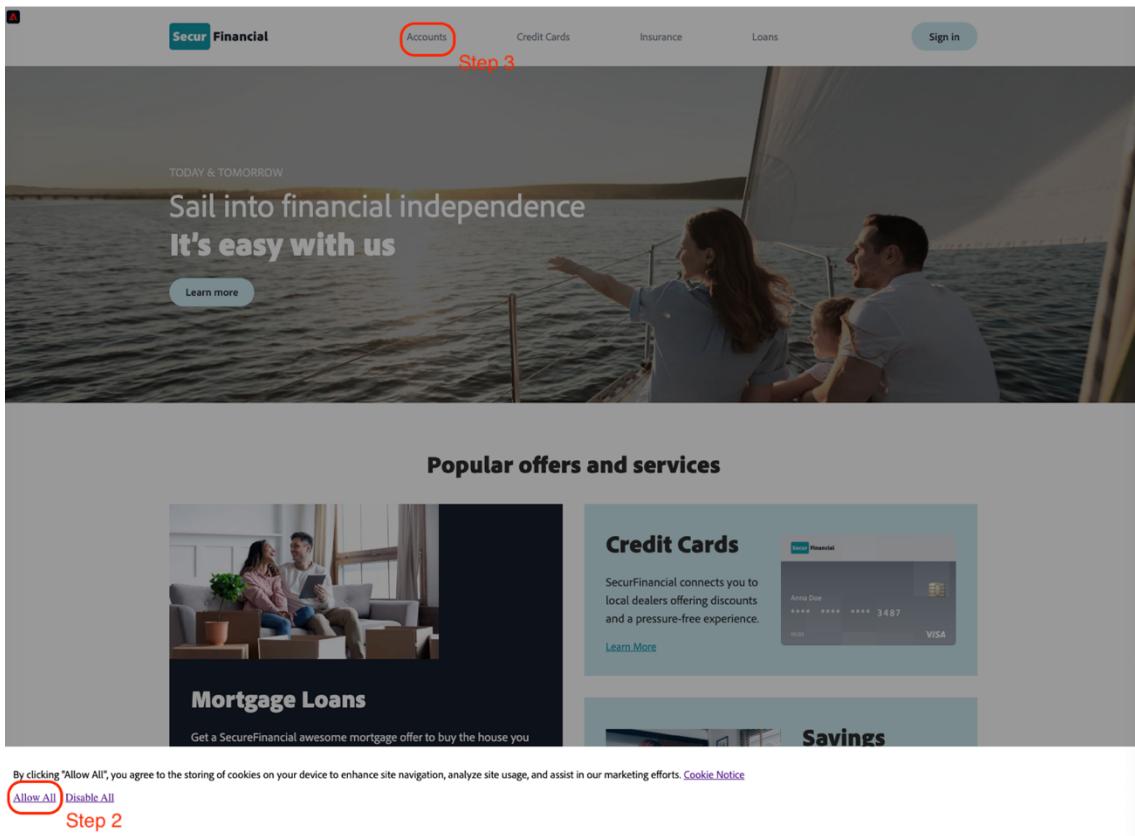

Lesson Overview: In this lesson you experience the onboarding journey of a new SecurFinancial customer.

Exercise 1.1 – Create a checking account

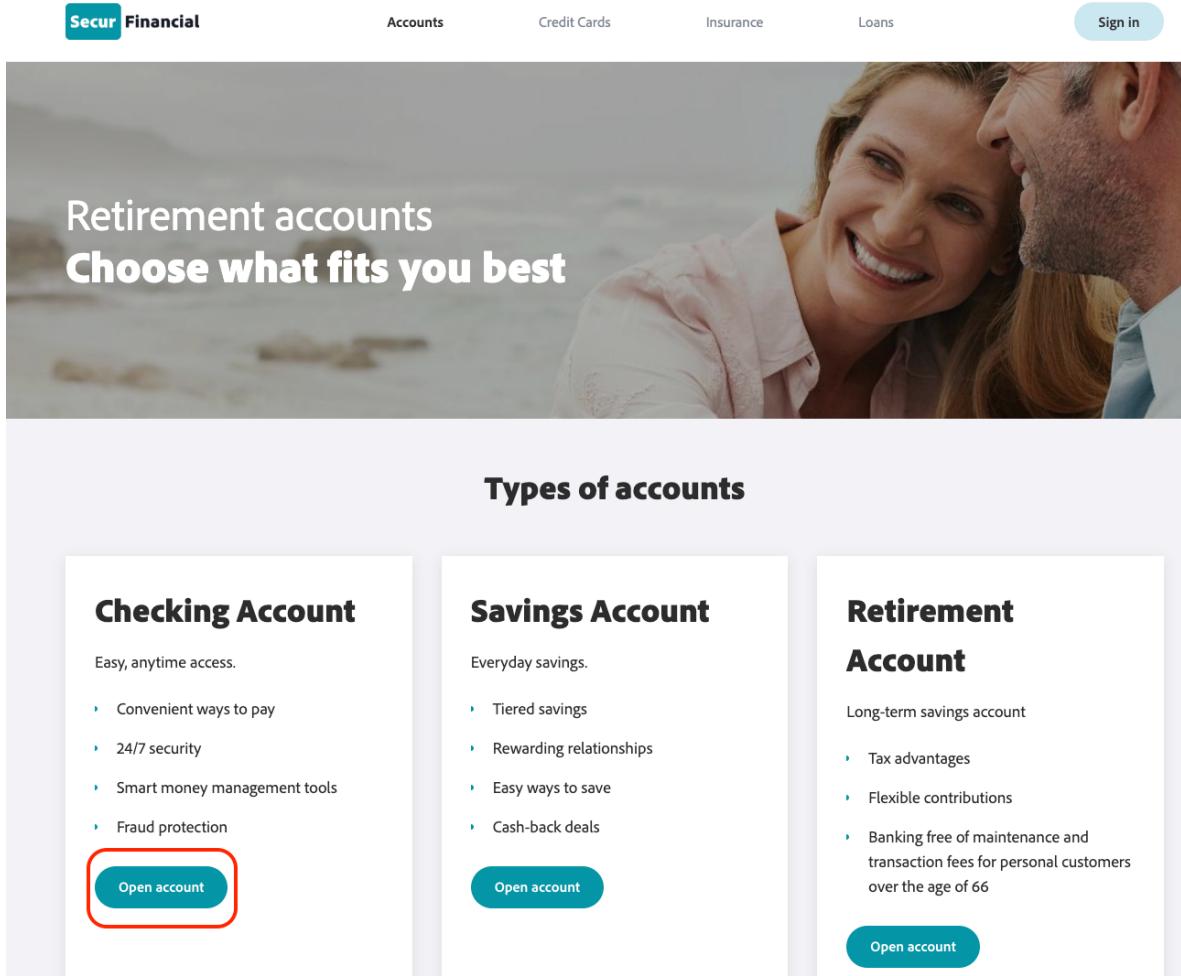

Step 1: Navigate to the [SecurFinancial website](#)

Step 2: Select to Allow All cookies in the pop up at the bottom of the home screen

Step 3: Click on **Accounts** in the top navigation.

Step 4: On the Accounts page, in the **Checking Account** section, click on the **Open account** button.

The screenshot shows the Secur Financial website's homepage. At the top, there's a navigation bar with links for 'Accounts', 'Credit Cards', 'Insurance', 'Loans', and a 'Sign in' button. Below the navigation is a large banner with a photo of a smiling couple at a beach. The banner text reads 'Retirement accounts' and 'Choose what fits you best'. Underneath the banner, the page title 'Types of accounts' is centered. Three cards are displayed side-by-side: 'Checking Account', 'Savings Account', and 'Retirement Account'. Each card lists benefits and features, followed by a blue 'Open account' button. The 'Checking Account' button is specifically circled with a red border.

Checking Account

Easy, anytime access.

- Convenient ways to pay
- 24/7 security
- Smart money management tools
- Fraud protection

[Open account](#)

Savings Account

Everyday savings.

- Tiered savings
- Rewarding relationships
- Easy ways to save
- Cash-back deals

[Open account](#)

Retirement Account

Long-term savings account

- Tax advantages
- Flexible contributions
- Banking free of maintenance and transaction fees for personal customers over the age of 66

[Open account](#)

Step 5: On the new-account-step-1 page, populate the form - these fields are required for the lab!

1. Add First Name and Last Name
2. Add your **Email address** – Make sure to choose an email address that you can access during the lab!
3. Add your **Phone** number – Make sure to add the country code in front of your number. For example for the US and Canada +1234567890!
4. Add your **seat number**. You can find your seat number on the lab machine's desktop.

5. Select your communication preference.

Double check that you have entered an email address or phone number that you have access to from your phone.

6. Click on **Next**

The screenshot shows a web form for account creation. At the top, there is a logo for "Secur Financial" and navigation links for "Accounts", "Credit Cards", "Insurance", and "Loans". A "Sign in" button is also visible. The main form area contains the following fields:

- First Name ***: Jane
- Last Name ***: Doe
- Email Address ***: jane.doe@email.com
- Phone Number (include the country code!) ***: +1669123456
- Seat Number ***: 999
- Communication Preference ***:
 Email SMS

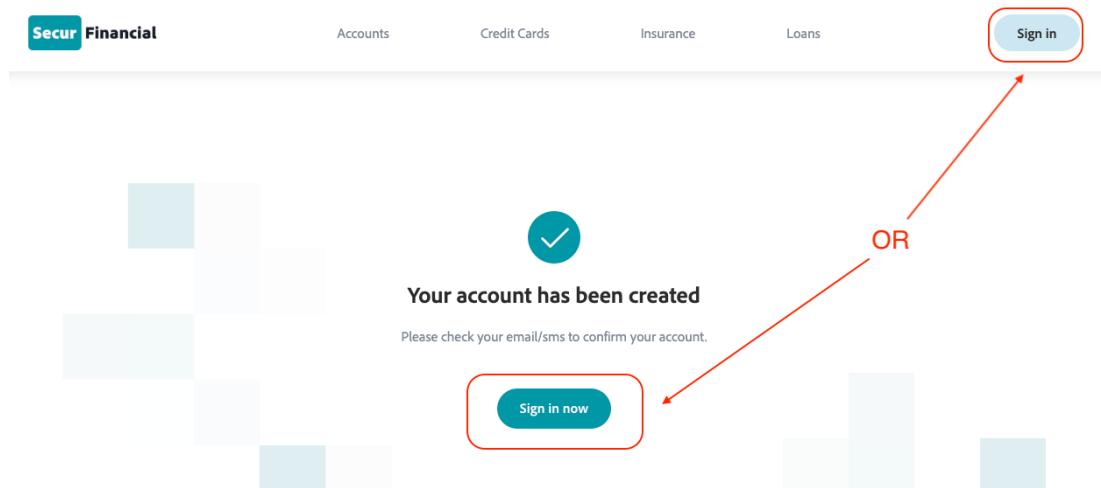

At the bottom of the form are two buttons: a teal "Cancel" button on the left and a teal "Next" button on the right.

Step 6: Enter data on the new-account-step-2 page:

1. The address details are optional.
2. Select your **communication preference**: Email or SMS
3. Click on **Submit**

Exercise 1.2 – Sign in to your account

Step 1: Click the **Sign in now** or the **Sign in** button on the new-account-form-submitted page.

Step 2: On the sign-in screen, enter the email address you created the account with.

The screenshot shows a 'Sign in to your account' form. At the top, there is a 'Secur Financial' logo. Below it, the title 'Sign in to your account' is centered. There are two input fields: an 'Email' field and a 'Password' field, both enclosed in a red rectangular border. Below the password field is a 'Forgot Password?' link. At the bottom of the form are two buttons: a red 'Sign In' button on the left and a blue 'Create an account' link on the right.

Result: You should see a personalized web in-app message appear on your dashboard:

The screenshot shows the Secure Financial mobile app's dashboard. At the top, there is a navigation bar with tabs for Dashboard, Accounts, Credit Cards, Insurance, Loans, and a user profile for 'Jane'. A large, semi-transparent promotional overlay is centered over the main content area. The overlay features a banner with the text 'Fully digital experience' and 'Your favorite bank is now digital'. Below this is a large image of a hand holding a smartphone displaying the app's interface. The text 'Manage your money with our mobile app!' is overlaid on the phone screen. A blue button at the bottom of the overlay says 'Download the app now'. To the right of the overlay, there are several small, partially visible text snippets: 'block card', 'off the card', and 'card settings'. On the left side of the dashboard, there is a section titled 'Hello, Jane' followed by 'PRIMARY ACCOUNT Checking (16 1020 1026 0000 1402 046'. Below this is a 'BALANCE \$12,920.00'. Underneath the balance, there is a section titled 'Latest transactions' listing five recent transactions:

Date	Type	Category	Description	Amount
07/26/2021	Farmer's Shop	Grocery	Card Payment	- \$345
07/25/2021	Mobile Bill	Finance	Transfer	- \$95
07/13/2021	Internet Bill	Finance	Transfer	- \$220.40
07/12/2021	Cinema	Entertainment	Card Payment	- \$20
07/26/2021	Farmer's Shop	Grocery	Card Payment	- \$23

To the right of the transaction table is a bar chart showing monthly spending trends from January to December. The y-axis represents the amount in thousands, ranging from 0 to 12K. The x-axis lists the months. The bars show a general upward trend, with significant peaks in February, November, and December.

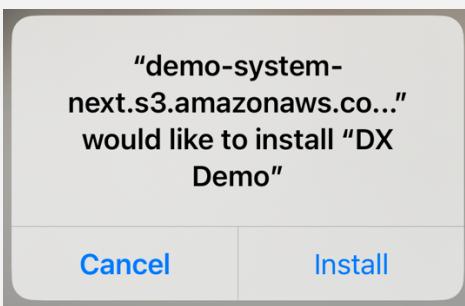

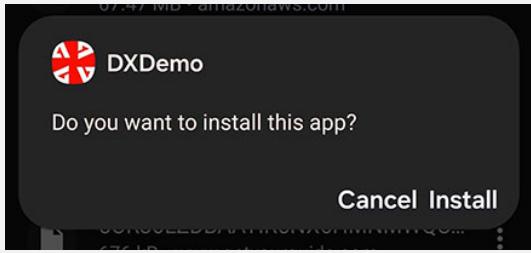

This screenshot shows a different view of the Secure Financial mobile app's dashboard. The top navigation bar is identical to the previous one. A new in-app message overlay is displayed, featuring a banner with the text 'Fully digital experience' and 'Your favorite bank is now digital'. Below this is a large image of a hand holding a smartphone displaying the app's interface. The text 'Manage your money with our mobile app!' is overlaid on the phone screen. A blue button at the bottom of the overlay says 'Download the app now'. The rest of the dashboard is similar to the first one, showing the 'Hello, Jane' greeting, primary account information, balance, and latest transactions. The bar chart on the right also remains the same, showing monthly spending trends.

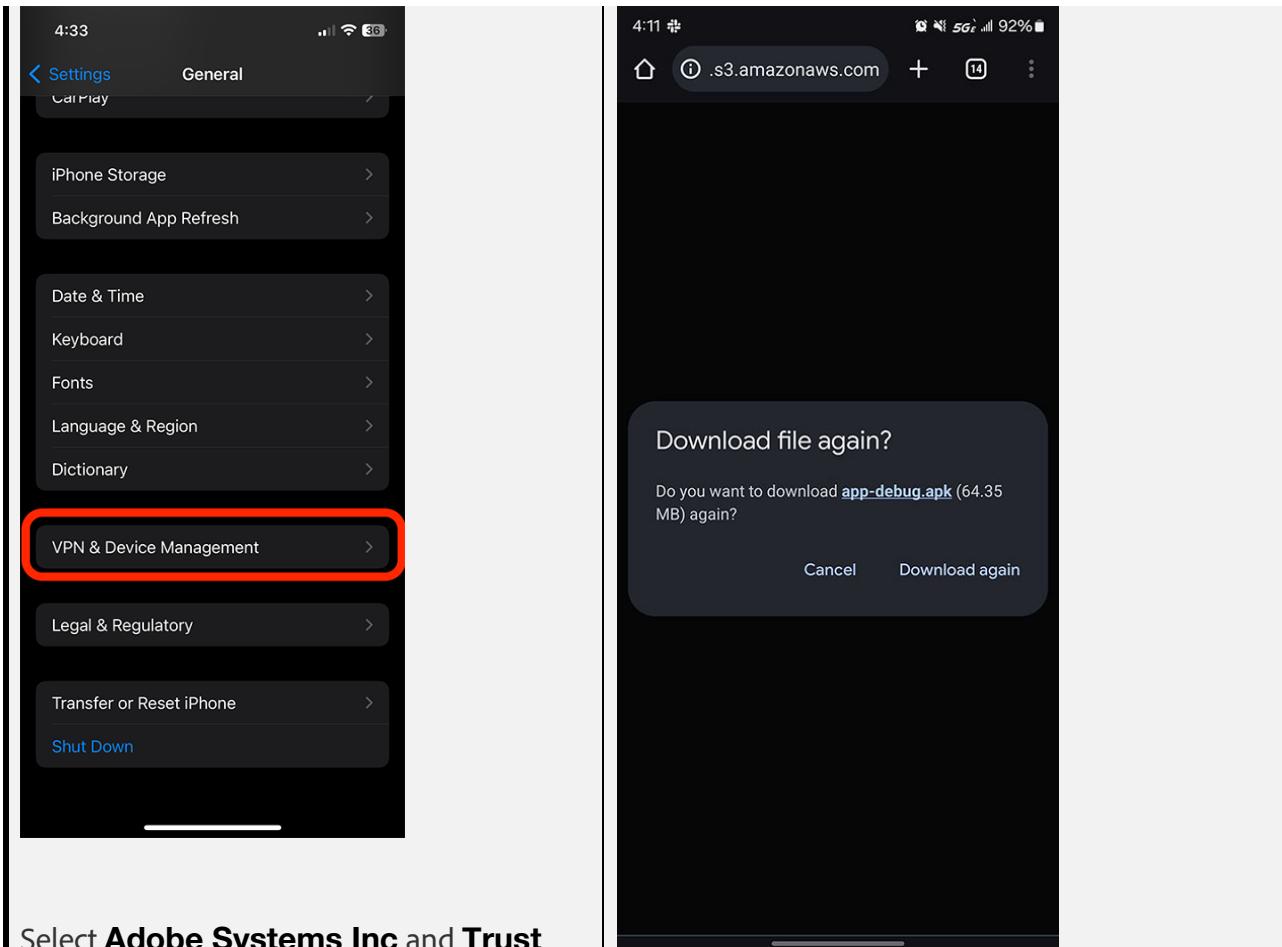

Exercise 1.3 - Install the app

Step 1: Click on the [Download the app now](#) button - if you don't see the in-app message, then click the link here in the workbook.

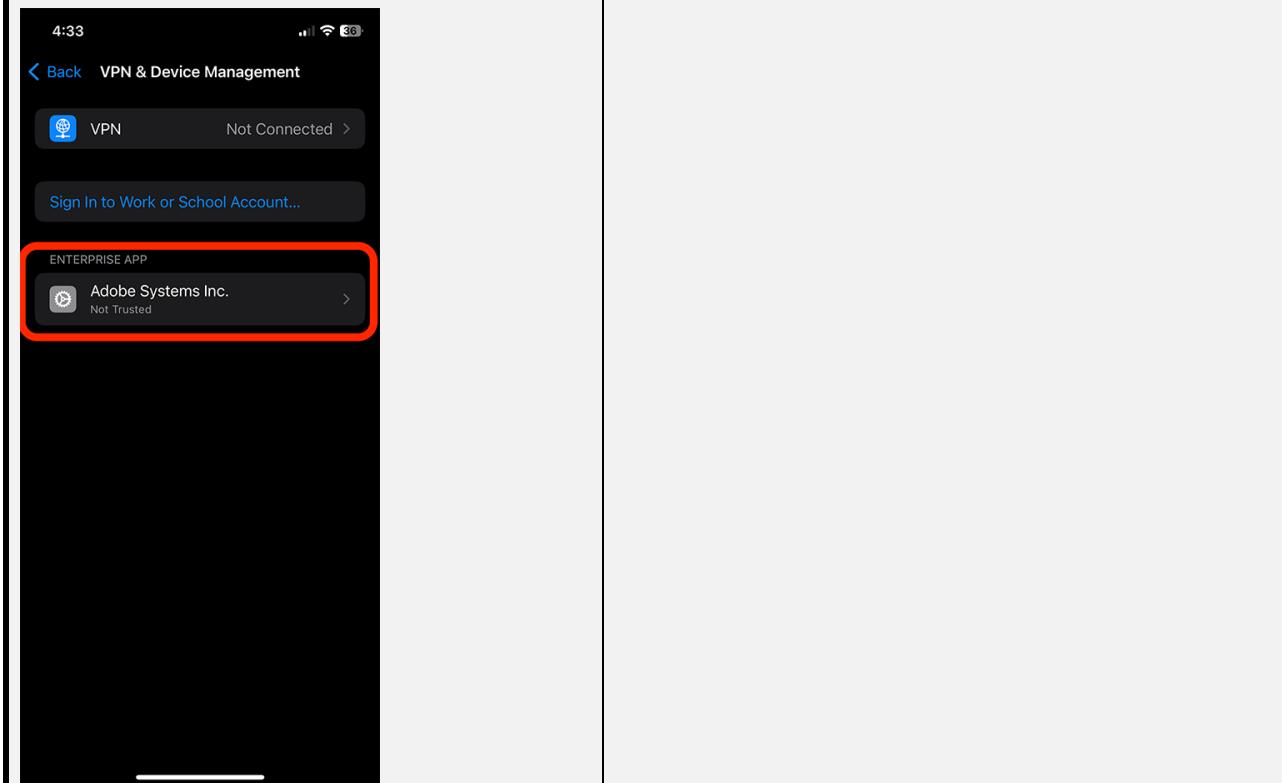

Step 2: Scan the QR code to install the app.

Step 3: Follow the instructions below to install the app

iOS	Android
<p>1. Click on Install</p>  A screenshot of an iOS device screen showing a download alert from the App Store. The alert text reads: "demo-system-next.s3.amazonaws.co... would like to install 'DX Demo'". Below the text are two buttons: "Cancel" on the left and "Install" on the right. <p>2. Trust Adobe enterprise developer</p> <p>After installing the app, you must trust the Adobe enterprise developer:</p> <p>Go to Settings > General > VPN & Device Management.</p>	<p>1. Download and install the APP by following the alert instructions shown here:</p>  A screenshot of an Android device screen showing a download alert. The alert text reads: "Do you want to install this app?" Below the text are two buttons: "Cancel" on the left and "Install" on the right. The alert also includes the URL "http://S3BUCKETNAME.s3.amazonaws.com/..." and a timestamp "07.47 MB 1 min ago".

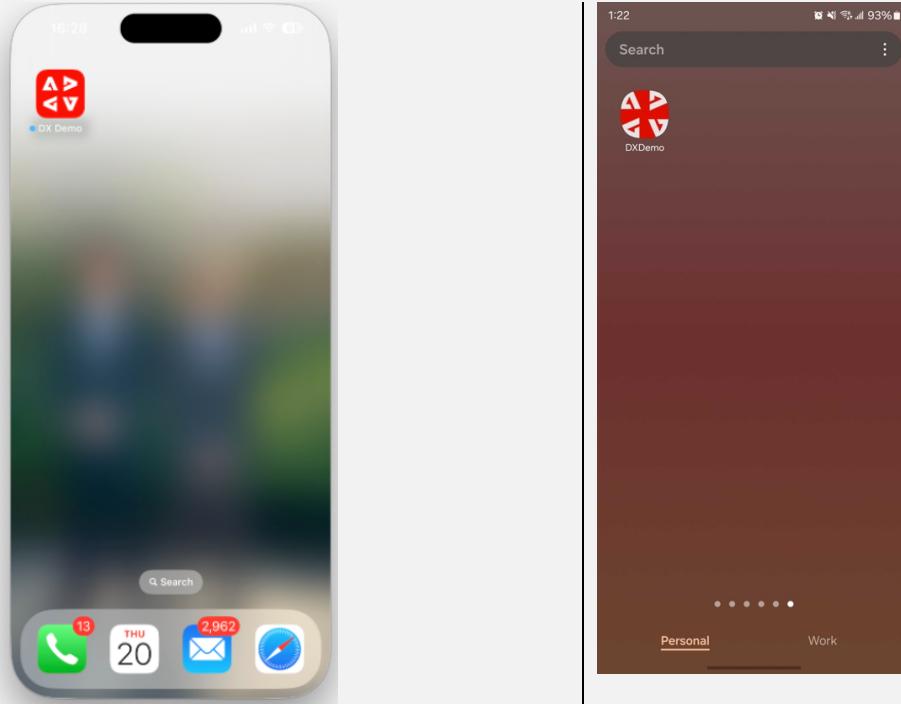

Select **Adobe Systems Inc** and **Trust Adobe Systems Inc.**

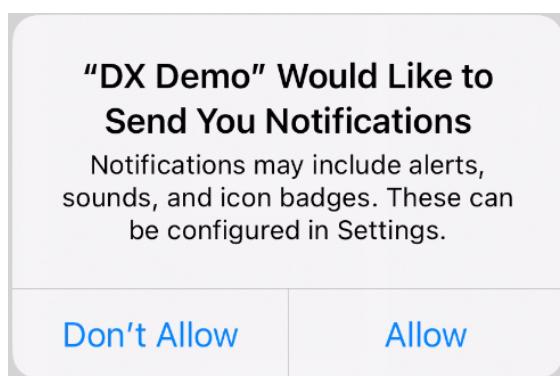

You need to restart your phone.

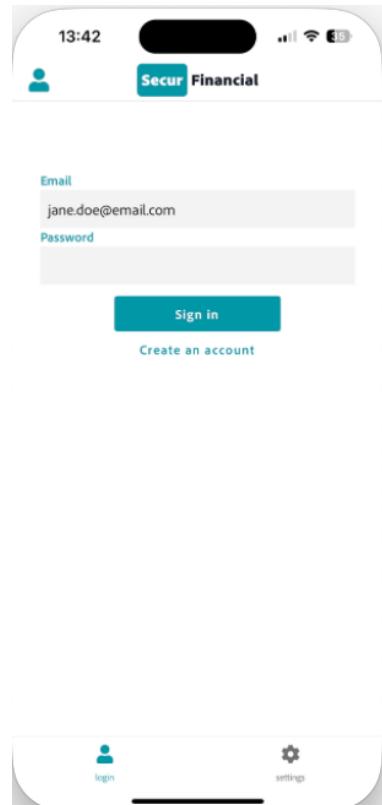

Result: You should now be able to launch the **SecurFinancial** app on your Phone

Step 4: Open the app and on the pop up, select **Allow**.

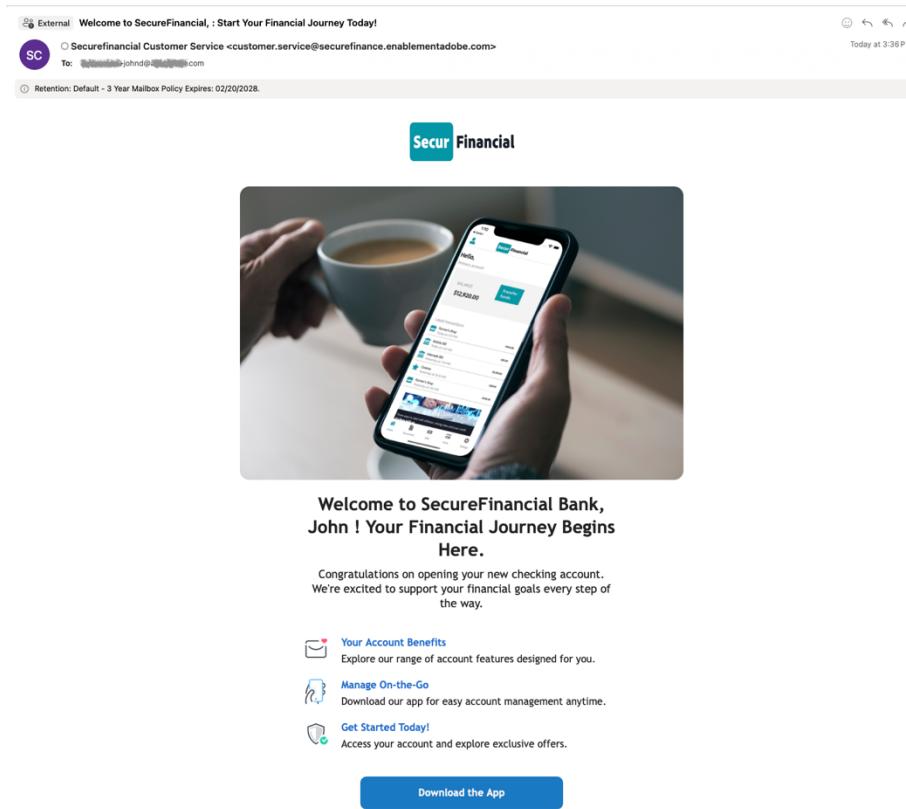

Step 5: Log in to the app using the email address you created the checking account with. You do not need to enter a password.

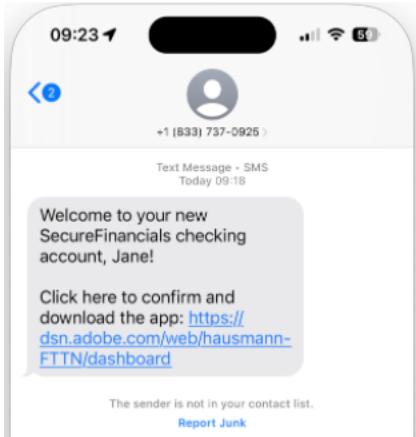

Exercise 1.4 Check the results of your journey

The web in app notification you saw when you logged into the dashboard is only one touchpoint the SercurFinancial brand had with you. Depending on the communication preferences you selected on the account creation form, you either received

....an email - check your spam folder if you don't have the email in your inbox.

...or a SMS

You will also receive a push notification as part of the welcome journey.

Lesson 2 – Create a Welcome Journey

Lesson Overview: In this exercise you start building the welcome journey, based on an existing journey. You start by defining the entry criteria and then build compose the email message first, using the AI Content Accelerator.

Exercise 2.1 – Login to Journey Optimizer

If you are already logged in on your machine lab machine continue to [Exercise 2.2](#).

Step 1: Open [Adobe Journey Optimizer](#)

Step 2: Log in using the following details:

Email Address: L535+*your seat number*@adobeeventlab.com

Password: Adobe4Summit!

You can find the details for your login on your lab machine desktop. Use the **Adobe ID** and the **Password**.

Step 3: You are asked to add a mobile number, select **Not now**.

Result: After logging in, you are on the Journey Optimizer homepage.

Exercise 2.2 – Start building the journey

- Step 1:** In the left navigation, under **Journey Management**, click on **Journeys**. In the search bar, type in your seat number with three digits (for example “001” for seat number 1, “023” for seat number 23) and hit return.
- Step 2:** From the search results, select the journey that is called “*your_seat_number-Welcome Journey*” to open the journey canvas.

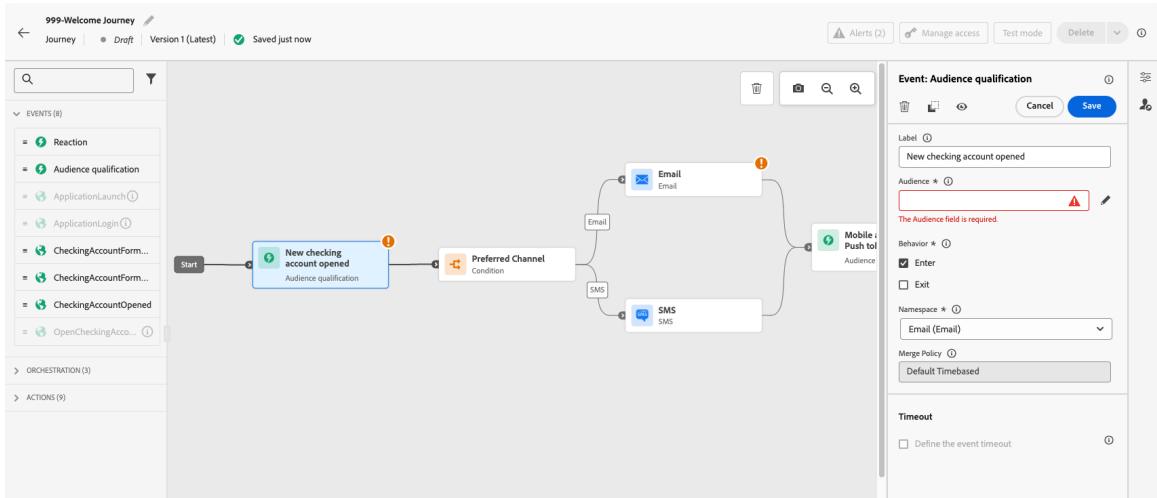

The screenshot shows the Adobe Journey Optimizer interface. On the left, there's a navigation sidebar with icons for Home, Journey management (expanded), Campaigns, Journeys (highlighted with a red circle), Reports, Decision Management, Offers, and Components. The main area is titled 'Journeys' and shows a search bar with '999' and a result count of '1 of 1'. Below the search is a 'Filtering by' section with 'Version: Latest' and 'Clear all' buttons. A table lists the journey details: Name '999-Welcome Journey', Status 'Draft', and an ellipsis button.

Result: You should see the journey canvas with the journey template:

Step 3: Configure the event that triggers the journey. In our case we will use an audience qualification event.

1. In the journey click on the **New checking account opened** audience qualification event on the canvas, to open the details on the right of the canvas.
2. You will see that the Audience field is marked red. Click on the pencils next to the field.

3. On the audience selection screen, in the search bar, type in *SecurFinancial* and then select **SecurFinancial Checking account Opened**

Name	Profile Count	Update Time	Creation Time
<input checked="" type="checkbox"/> SecurFinancial Checking Account Opened	75	3/3/2025, 8:34 AM	2/13/2025, 4:07 PM
<input type="checkbox"/> SecurFinancial - Not Using Mobile App	0	2/25/2025, 11:23 AM	2/25/2025, 10:39 AM
<input type="checkbox"/> SecurFinancial - Not Mobile App Users	117	2/25/2025, 10:51 AM	2/25/2025, 9:28 AM
<input type="checkbox"/> SecurFinancial - Mobile App User	31	2/25/2025, 9:02 AM	2/25/2025, 9:02 AM
<input type="checkbox"/> SecurFinancial - Interested in consolidating finances	0	2/12/2025, 3:18 PM	2/12/2025, 3:18 PM
<input type="checkbox"/> SecurFinancial - Interested in loans	0	2/12/2025, 3:18 PM	2/12/2025, 3:18 PM
<input type="checkbox"/> SecurFinancial - Looking for a house	0	2/12/2025, 3:18 PM	2/12/2025, 3:18 PM

4. Click **Save**

5. Back on the Event details screen, under **Behavior**, make sure **Enter** is checked. With this setting, a profile falls into the journey, when they qualify for the selected audience.

Event: Audience qualification

6. Click **Save**, to save the configuration.

Exercise 2.3 – Compose the email message

Your challenge: SecurFinancial has provided you with some brand guidelines, but the email marketing specialists are currently not available, so you will need to compose a compelling email message.

The solution: Use the AI Assistant for content generation to help you compose the email message.

Step 1: Click on the **Email** action.

Result: The action's detail pane opens on the right

Step 2: Configure the email

1. Give your action a Label for example Welcome Message.

Actions: Email

Label Welcome Message

Description

ID 02a724a6-e211-4eb6-8c31-a766e64f8022

Category Marketing

Email configuration * SecurFinancial-Email_Marketing X

Review [Frequency rule](#) for the selected category and channels.

Edit content Edit content

2. You can leave the description field blank.

3. Click the **Edit Content** button to open the the content editor.

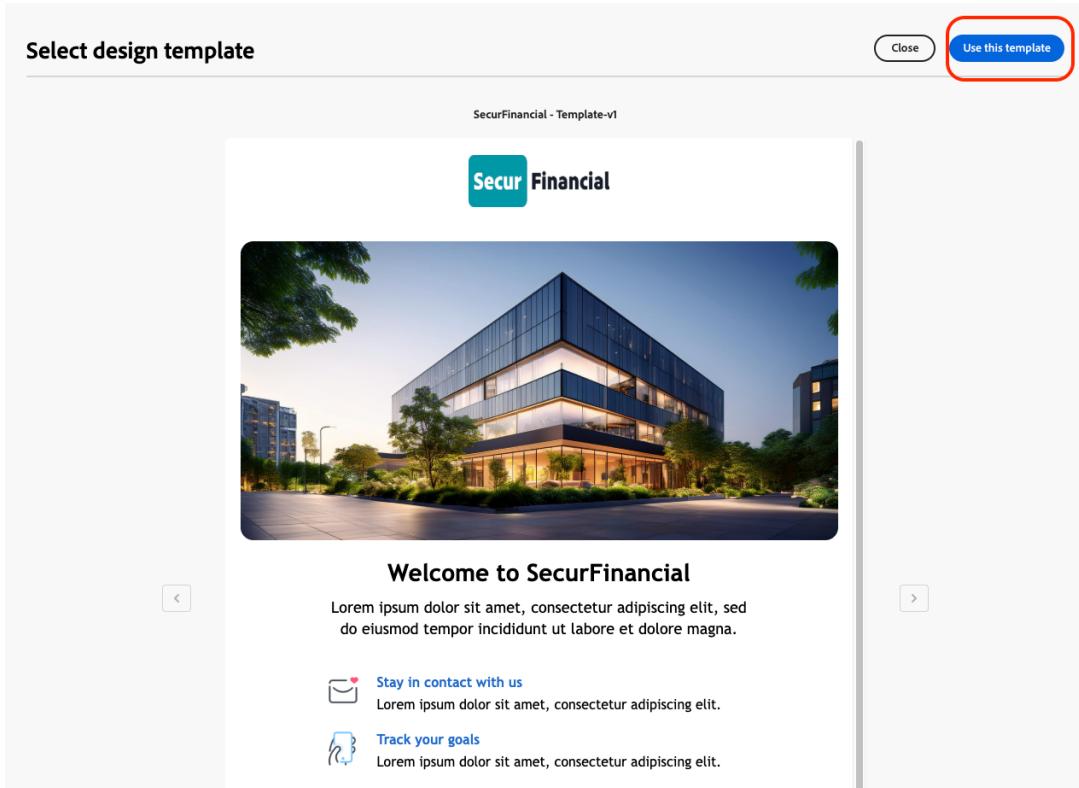

Step 3: From the Edit content screen click on **Edit Email Body** to access the Email Designer

The screenshot shows the 'Email - Welcome Message' configuration screen. On the left, there's a sidebar with 'SMS', 'Email - Welcome Message' (which is selected and highlighted in grey), and 'Push - Welcome notification'. The main area is titled 'Email - Welcome Message'. At the top right are buttons for 'Alerts (4)', 'Add languages', 'Add Business Rule', 'Create experiment', and 'Simulate content'. Below these are 'View configuration details' and 'Content template' buttons. The central part of the screen displays an email message with the subject 'SecurFinancial' and the recipient 'From:securfinancial@securefinance.enablementadobe.com'. To the right of the message are sections for 'Header' (From name: SecurFinancial, From email: securfinancial@securefinance.enablementadobe.com) and 'Subject line' (No email subject line defined). Below these is a 'Body' section with the instruction 'Use the Email Designer for visual editing or uploading HTML'. A button labeled 'Edit email body' is shown, and it is circled with a red box.

Step 4: Navigate to the Saved Templates tab and click on the template called *SecurFinancial - Template-v1*. The template defines the layout of your email.

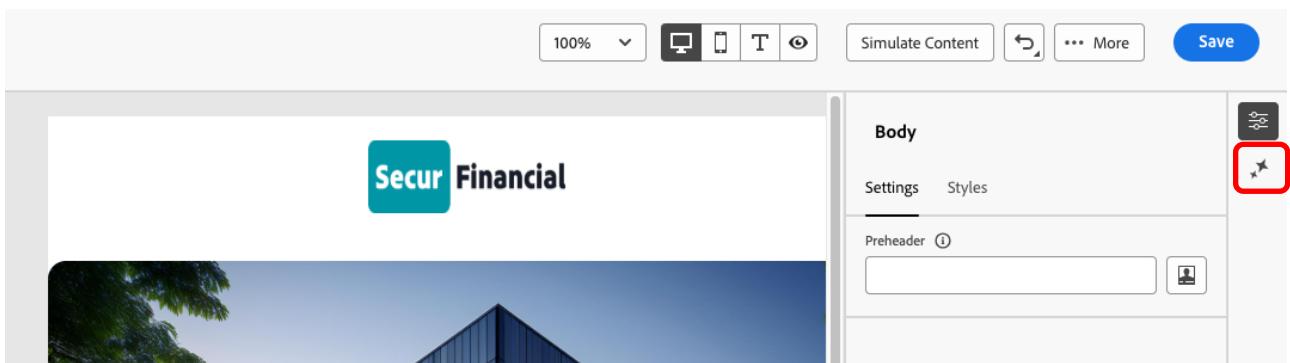

The screenshot shows the 'Create your email' interface. At the top, there are three options: 'Design from scratch', 'Code your own', and 'Import HTML'. Below this is a 'Select design template' section with a search bar and a 'Sort by Last modified' dropdown. Under 'Sample templates', there is a link to 'Saved templates', which is also circled with a red box. A table lists saved templates, with one entry highlighted by a red box: 'Name: SecurFinancial - Template-v1, Date created: 2/21/2025, 5:33:06 PM, Last modified: 3/7/2025, 3:09:45 PM'. The 'Cancel' button is located at the top right of the interface.

Step 5: Click the Use this template button.

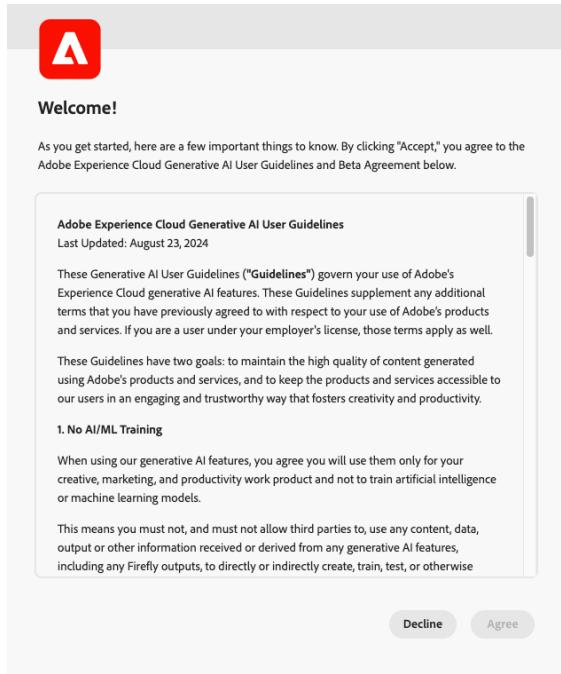

Result: You are now in the Message Designer. Use the AI assistant to generate the email content.

Step 6: Click on the two stars on the far right, to open the AI assistant.

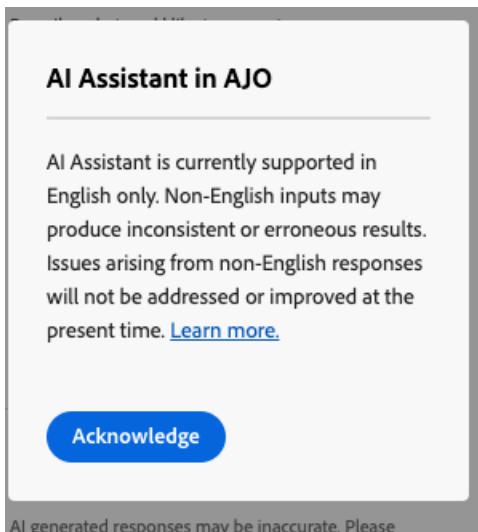

When you open the AI Assistant for the first time, you need to accept the **Adobe Experience Cloud Generative AI User Guidelines and Beta Agreement** before you can use the feature.

Step 7: Scroll down to the bottom of the text and click on agree.

Result: The AI Assistant pane opens on the right side.

Step 8: Click the **Acknowledge button** in the disclaimer pop up

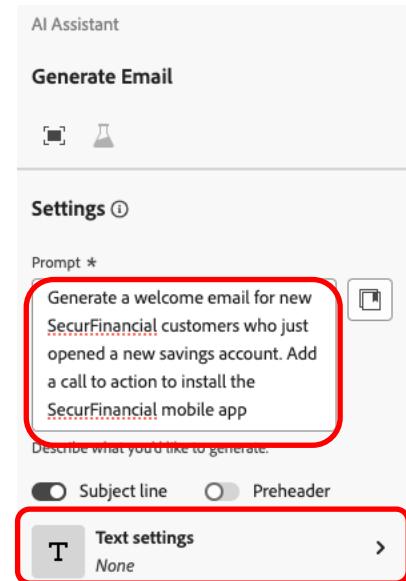

Step 12: Let's generate some content:

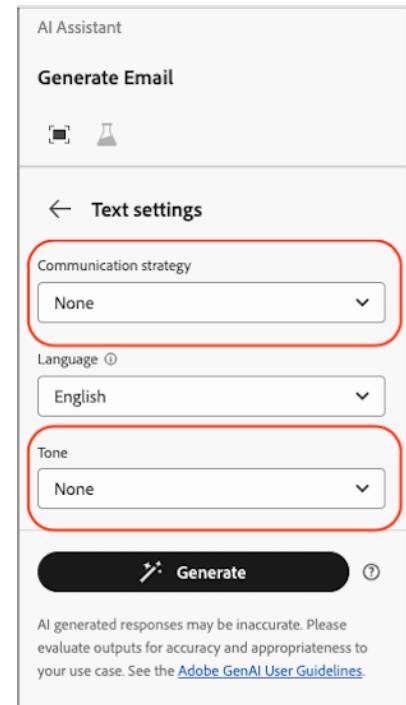

1. Copy and paste this prompt, or add your own:

"Generate a welcome email for new SecurFinancial customers who just opened a new savings account. Add a call to action to install the SecurFinancial mobile app."

2. Toggle the **Subject line** slider to the right to have the AI Assistant generate the subject line as well as the content.

3. Click on Text settings and choose your preferred **Communication strategy** and **Tone** from the dropdowns.

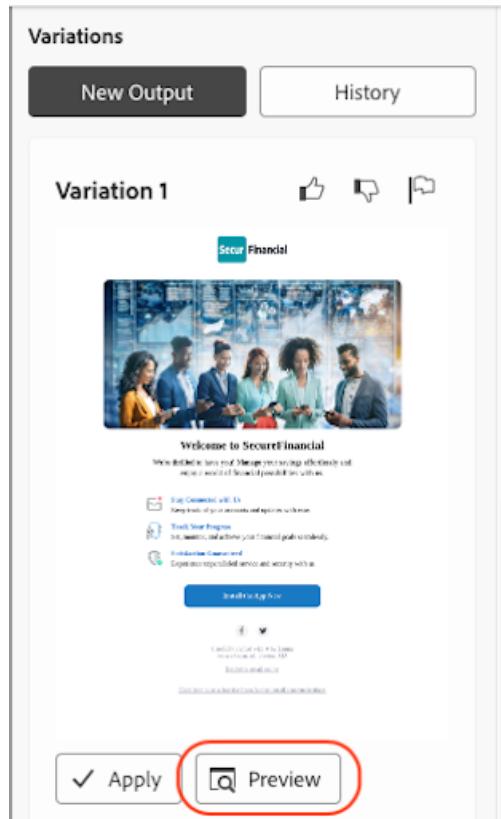

4. Click on Generate

Result: Two variations are generated.

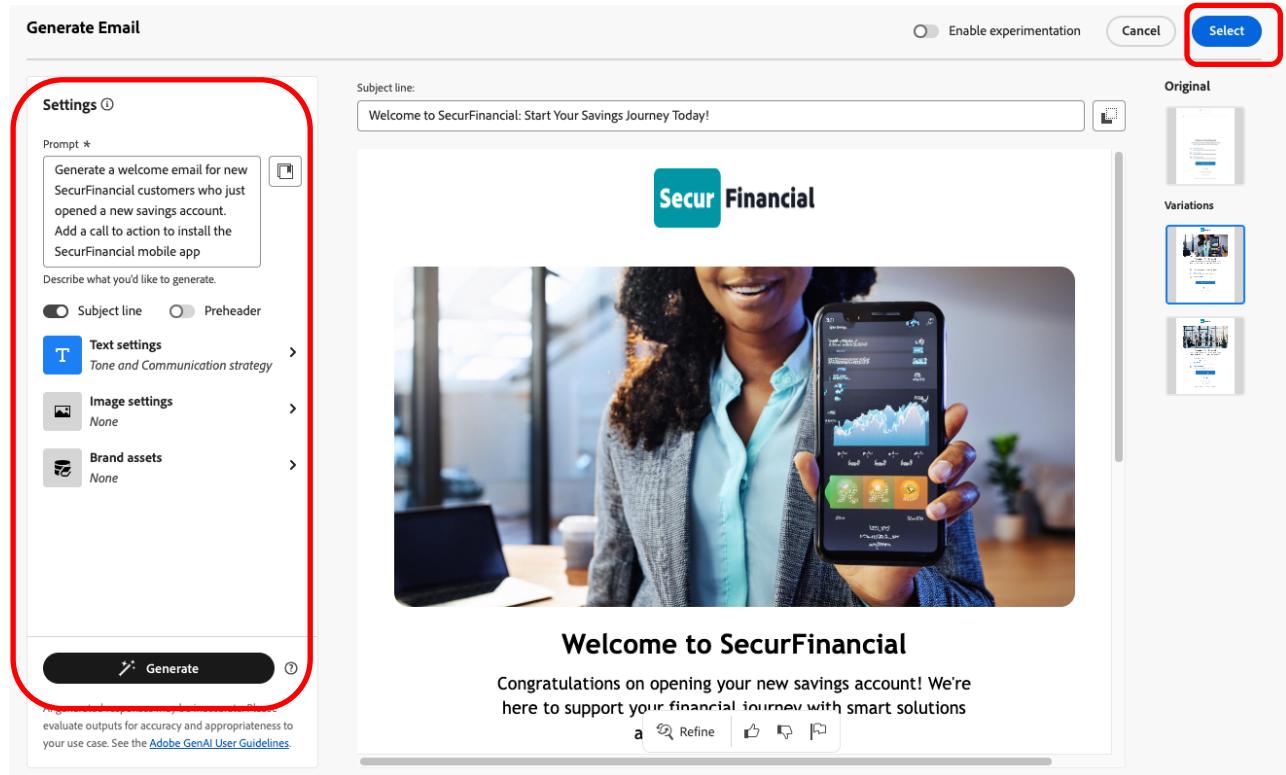

Step 11: Select a variation – your variation will look different to the screenshot in the workbook!

1. Click on the **Preview** button of one of the generated variations.

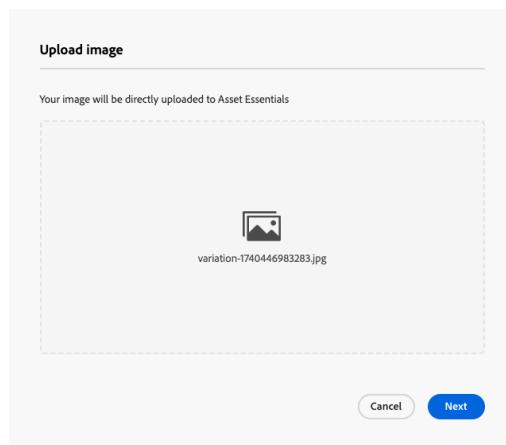

2. Review the two variations and select the one you prefer, you will modify it in the next step. If you want to have the AI make changes, you can change the settings or the prompt on the left side of the page and generate new variations.

3. Review the variations - you can modify your input in the **Setting** section and generate new variations.
4. Select one of the variations and click the **Select** button to apply the variation to your email.

5. Back on the email designer page, click save
6. You are prompted to upload the image to Asset Essentials, click **Next** on the modal

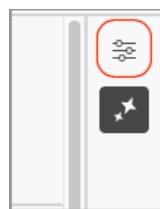

7. Click **Import** on the next screen
8. Double click on the **SecurFinancial** folder
9. Click on **Import**

Result: The images are uploaded to Asset Essentials and are available to be re-used.

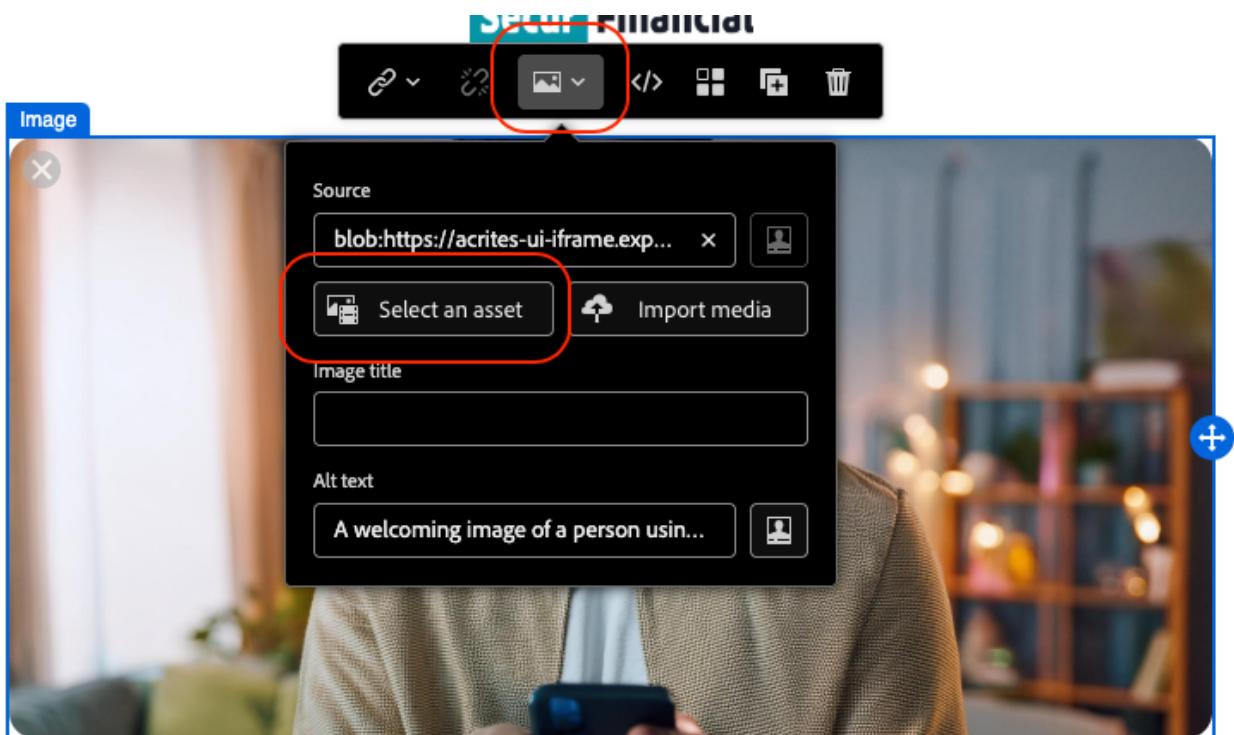

Step 12: Manually modify the email

1. Click on the on the right side of the screen to manually edit the content.

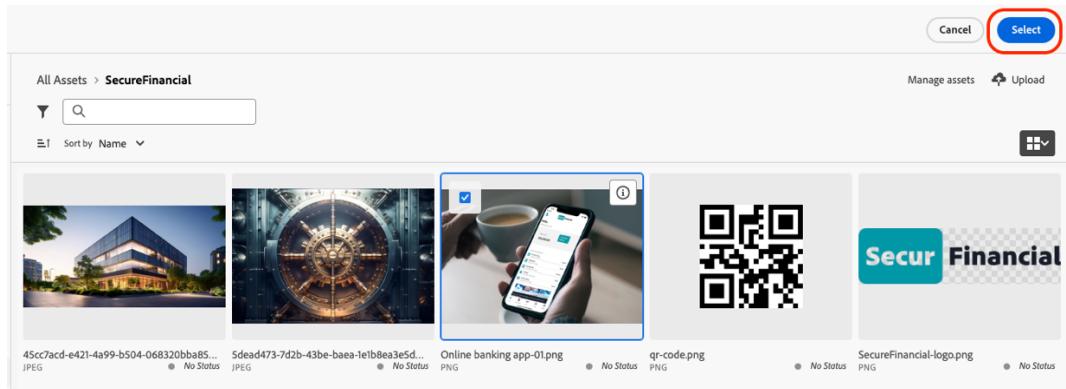

Now you can modify your email. Let's change the image :

1. Click on the hero image and select the image icon.
2. Click on Select an asset

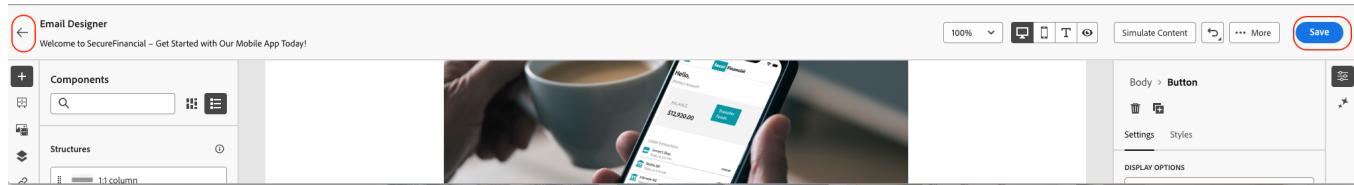

3. On the next screen, double click on the **SecureFinancial** folder and select an image.
4. Click on the **Select** button to apply it to your email.

You can make changes to any of the elements on the page.

Step 13: Once you are done, click **Save**

Step 14: Click the arrow on the top left of the page on this and the next page, to return to the journey.

Bonus Exercise:

Click on the Ai assistant icon to activate the AI Assistant again.

1. Click on the hero image -> the Ai Assistant generated new images which you can apply
2. Play around with the different options. For example, change the prompt or toggle the **Reference style** button to the right.
3. Click on a **text element**, you can now generate content just for the text you marked

Lesson 3 Dynamic Content

Your challenge: You need to make sure that only customers who have not already installed the app are asked to install it. Anyone who already has the app installed should only receive a general welcome message. You do not want to make the journey flow more complex.

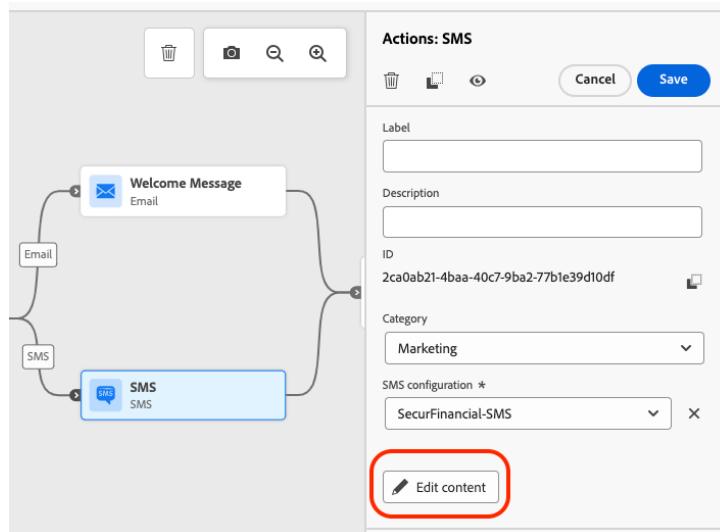

The Solution: Dynamic content allows you to adapt the content of your messages based on conditional rules that can be made up of profile attributes, contextual events or audiences. In this exercise you will apply it as an example , but it can be applied across all channels.

Exercise 3.1 – Apply dynamic content to the SMS message

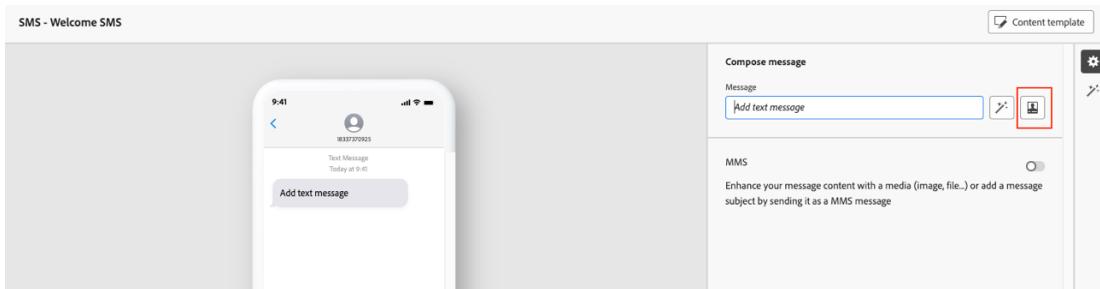

Step 1: Open the SMS action from the Journey Template ("your_seat_number-Welcome Journey").

Step 2: Click on "Edit Content".

Step 3: Click on the personalization icon under “Compose Message” section to open the personalization editor screen.

Step 4: Once the screen opens, click on “Conditions” in the left navigation to view or create conditional rules for the content.

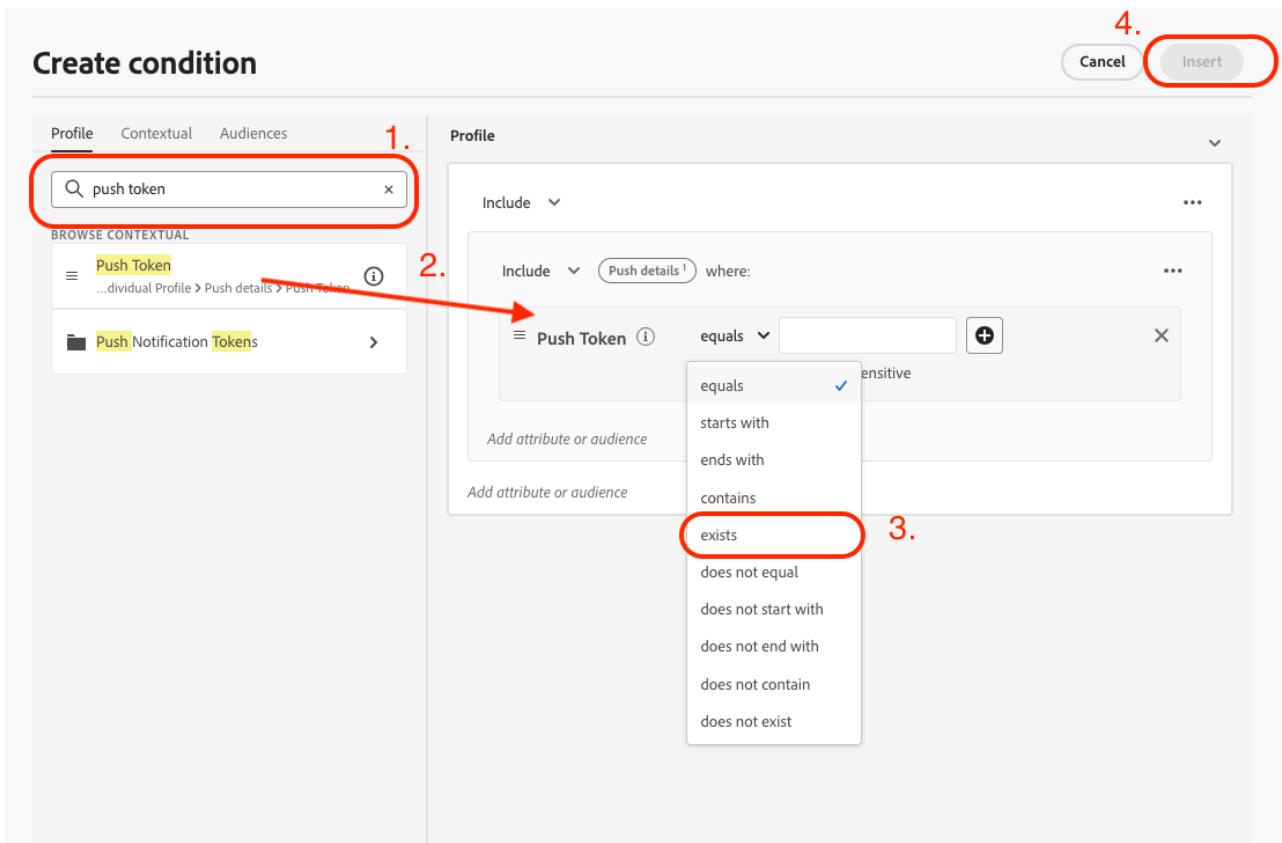

A screenshot of the 'Message' screen in the Adobe Journey Optimizer interface. The left sidebar has several options: 'Profile attributes' (selected), 'Audiences', 'Offer decisions', 'Contextual attributes', 'Helper functions', 'Favorites', 'Conditions' (which is highlighted with a red box), and 'Fragments'. The main area shows a 'Profile attributes' section with a search bar and a list of folder icons with names like '_experience', '_repo', '_techmarketingdemos', 'Billing Address', 'Billing Address Phone', 'consentPoliciesIDMap', 'consentPoliciesResultMap', and 'Consents and Preferences'. To the right, there's a preview area showing a welcome message: '1 Welcome to SecurFinan'.

Step 5: Click on "Create new" to create a condition from scratch.

The screenshot shows the 'Message' screen in Adobe Journey Optimizer. On the left, a sidebar lists navigation options: Profile attributes, Audiences, Offer decisions, Contextual attributes, Helper functions, Favorites, Conditions (which is selected and highlighted in grey), and Fragments. The main area is titled 'Conditions' and contains a search bar and a large empty box with a delete icon. Below this box, the text 'There are no conditions saved yet' is displayed. A red box highlights the 'Create new' button, which is located at the bottom of the empty box. In the top right corner, there are 'Cancel' and 'Save' buttons. To the right of the main area, a preview window shows a single step labeled '1 Welcome to SecurFinancial'.

Step 6: Once the condition builder screen loads:

1. Search for "Push token" in the search bar under profile.
2. Drag the Push token profile attribute to the condition builder on the right.
3. Select the **exists** function from the drop down.
4. Click on Insert.

Step 7: Remove everything from the code editor at this point and add the following code in the text box (select all) and paste in the code editor:

```
{%#if select _Push_details1 from profile.pushNotificationDetails where
_Push_details1.token.isNotNull() %}
```

Welcome to your new SecurFinancial checking account! Discover the SecurFinancial mobile app, designed for effortless banking. Manage accounts, transfer funds, and monitor transactions securely, anytime, anywhere. Open the app

```
{%else%}
```

Welcome to your new SecurFinancial checking account! Discover the SecurFinancial mobile app, designed for effortless banking. Manage accounts, transfer funds, and monitor transactions securely, anytime, anywhere. Click here to install the app: <https://demo-system-next.s3.amazonaws.com/dxdemo/summit/index.html>

```
{%/if%}
```

Message

The screenshot shows the 'Message' editor interface. On the left, there's a sidebar with various categories like Profile attributes, Audiences, Offer decisions, etc. The main area is titled 'Profile attributes' and contains a search bar and a list of items: '_experience', '_repo', '_techmarketingdemos', 'Billing Address', 'Billing Address Phone', 'consentPoliciesIDMap', and 'consentPoliciesResultMap'. To the right, there's a code preview window displaying the following snippet:

```

1 {%#if select _Push_details1 from profile.pushNotificationDetails where
2 _Push_details1.token.isNotNull() %}
3 Welcome to your new SecurFinancial checking account! Discover the SecureFinancial
4 mobile app, designed for effortless banking. Manage accounts, transfer funds, and
5 monitor transactions securely, anytime, anywhere. Open the app
6 Click here to install the app: https://demo-system-next.s3.amazonaws.com/dxdemo/summit/index.html
7
8
9 {%/if%}
10 ...

```

At the top right of the code preview window are 'Cancel' and 'Save' buttons.

Step 8: Click on Save.

This screenshot is similar to the previous one, showing the 'Message' editor. The 'Profile attributes' section and the code preview window are visible. The 'Save' button at the top right is highlighted with a red box.

Step 9: Use the back button to go back to main screen.

This screenshot shows the main screen of the Adobe Journey Optimizer interface. A card for the '999 Welcome Journey' is displayed, showing it's a 'Draft' version 1 (Latest) and was 'Saved a few seconds ago'. The card includes three communication channel options: SMS, Email, and Push - Welcome notification. The 'SMS' option is selected. To the right of the card, there's a preview of an SMS message with a timestamp of 9:45. The 'Saved a few seconds ago' status is also highlighted with a red box.

Step 10: Then Click on **Save** again. And now you have added dynamic content to the SMS.

The screenshot shows the Adobe Journey Optimizer interface. On the left, a workflow diagram is displayed with two main nodes: 'Welcome Message' (Email) and 'SMS'. Arrows indicate a flow from the 'Welcome Message' node to both an 'Email' node and an 'SMS' node. The 'SMS' node is highlighted with a blue border. On the right, a modal dialog box titled 'Actions: SMS' is open. The 'Save' button in the top right corner is circled in red, indicating the user action. The dialog fields include: Label (empty), Description (empty), ID (2ca0ab21-4baa-40c7-9ba2-77b1e39d10df), Category (Marketing), and SMS configuration (SecurFinancial-SMS). A 'Edit content' button is also present at the bottom of the dialog.

Lesson 4 – Content Experimentation

Your challenge: You have several approaches for the push message in mind but are not sure which one will be most efficient. You want to make sure the most effective message is sent.

The Solution: Content experiments allow you to optimize content for the actions in your journey. Through content experimentation, you can expose a given variation of a message to a group of randomly selected users and another variation/treatment to a different set of randomly selected users. After sending the message, you can then measure the outcome metrics you are interested in. In this lesson, you will apply content experimentation to the push message.

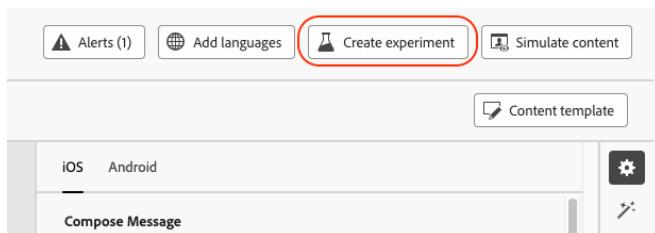

Exercise 4.1 – Create a content experiment

Step 1: From the journey canvas, click on the **In-app message** action.

Step 2: Click **Edit Content** on the Actions detail pain on the right, to open the content editor.

Step 3: Click on the **Create experiment** button on the top right of the page.

Result: You are on the page titles **Create experiment – Push Welcome notification**.

Step 4: In the Details section, select **Clicks (AJO)** from the Success metric dropdown.

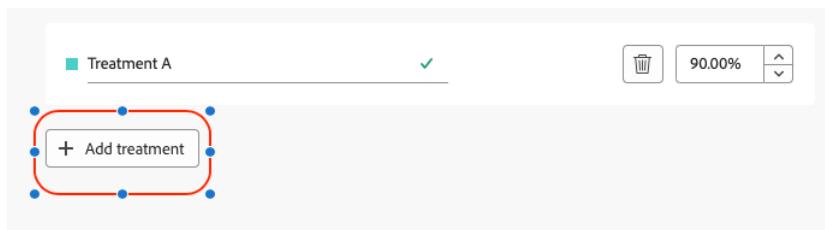

After experiment is created, you can start designing the content for your treatments. If you already created content for this campaign, the content will apply to the first treatment.

Details

Success metric [?](#)
Clicks (AJO)

Step 5: Toggle the **Distribute evenly** button to the right. To split the traffic evenly between all treatments.

Step 6: Click the **Add Treatment** button to add a second treatment.

Step 7: Click the **Create** button on the top right

Result: The treatments are shown on the left of the **Push editor page**.

Exercise 4.2 – Configure the treatments

Treatment A is the initial SMS. Modify treatment C.

Step 1: Click on the **Push notification** beneath Treatment C

The screenshot shows the 'Push Notification' configuration for Treatment C. On the left, under 'Treatments', 'Treatment A' has a 'Push Notification' item selected, highlighted with a red oval. In the center, there's a preview of an iPhone screen displaying a push notification with the title 'Welcome to SecurFinancial' and the message 'Did you know you can find an ATM near in the SecurFinancial app? Try it now!'. On the right, the 'iOS' tab is selected for message composition. The 'Compose Message' section includes fields for 'Title' (set to 'Welcome to SecurFinancial') and 'Body' (set to 'Did you know you can find an ATM near in the Secur...'). Both fields have a green checkmark and a personalization icon. A large red oval surrounds both the 'Title' and 'Body' input fields. Below these, the 'On click behavior' section shows a 'DeepLink' set to 'dxdemo://atm'. The 'Add media' section contains a URL field with 'https://'. At the bottom, there's a 'Buttons' section.

Step 2: On the right pane, add a **Title**

"Welcome to SecurFinancial"

Step 3: Add the following text:

"Did you know you can find an ATM near in the SecurFinancial app? Try it now!"

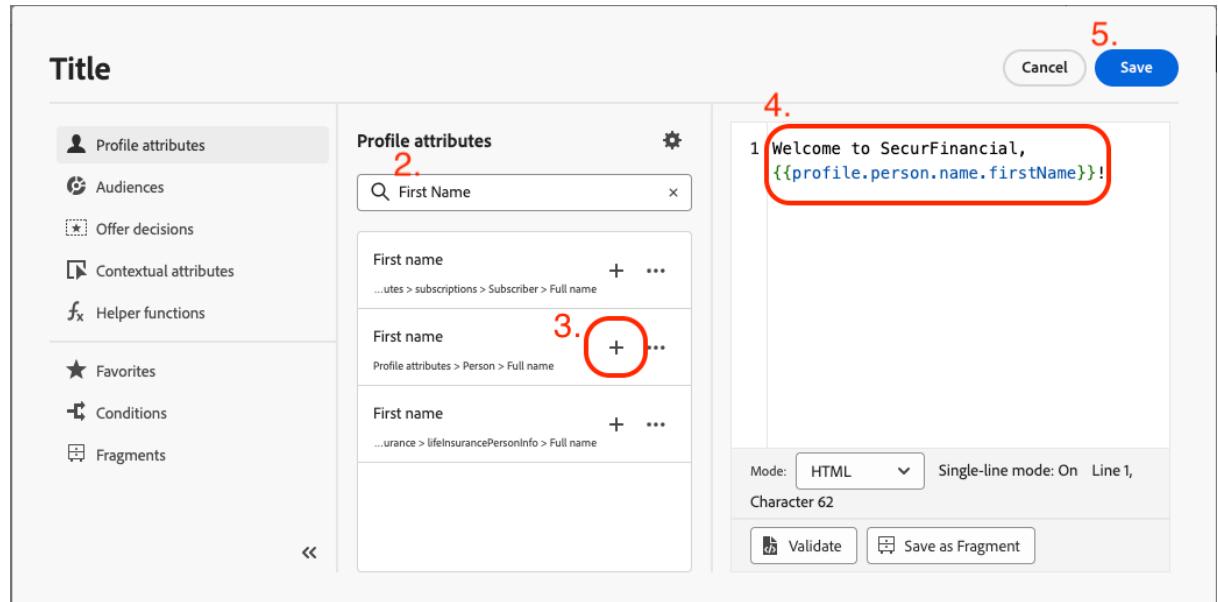

Step 4: Let's add some personalization to the message title:

1. Click on the **personalization icon** next to the title field:

This screenshot shows the 'Personalization' editor. It displays a search bar with the placeholder 'Search Profile Attributes' and a magnifying glass icon. Below the search bar, there's a list of attributes: 'First Name', 'Last Name', 'Email', 'Gender', 'Age Group', 'Device Type', and 'Location'. Each attribute is preceded by a small icon and followed by a dropdown arrow.

2. In the personalization editor, in the Profile attributes, search for **First Name**

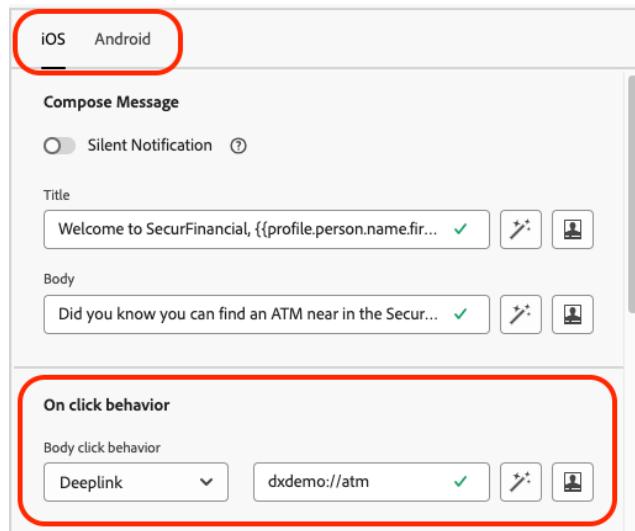

- Click the plus next to the **Profile>Person>Fullname** attribute to add it to the text.
- Add a comma before the personalization field.

- Once you are done, click **Save**.

Step 5: Change the **on click behavior** to open on the ATM page. On both the **iOS** and the **Android**, in the **On click behavior** section:

1. From the **Body click behavior** drop down, select **Deeplink**
2. Copy and paste this link: *dxdemo://atm* into field next to the dropdown.

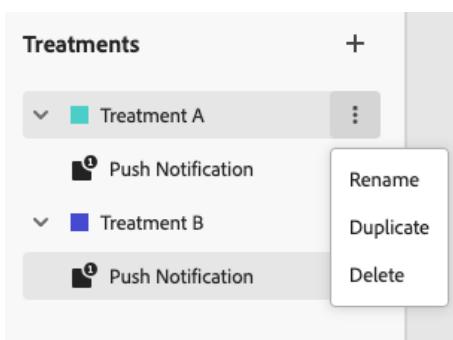

Result: Your content experiment is ready.

Step 6: Return to the Journey canvas and save your journey.

Bonus Exercise

You can create another treatment based on the initial email:

Click on the three dots next to Treatment A and select **Duplicate**.

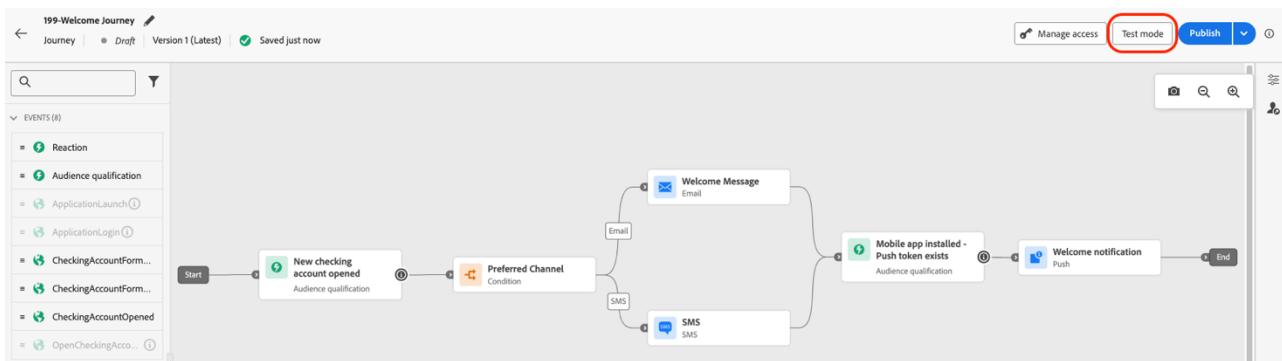

→ Modify the content using the AI assistant to create the content of a treatment.

Lesson 5 – Test your Journey

Testing the journey before publishing is a critical step. This helps the practitioner to see if the journey logic is set up as intended.

Exercise 5.1 – Test your welcome journey

Step 1: To activate the test mode, click the **Test mode** button, located in the top right corner of the welcome journey.

Step 2: Once the Test mode is activated you will see a section on the left side of screen that will allow you to change parameters for the test mode.

Test mode
This mode allows you to run a test of your journey and identify issues using test profiles.

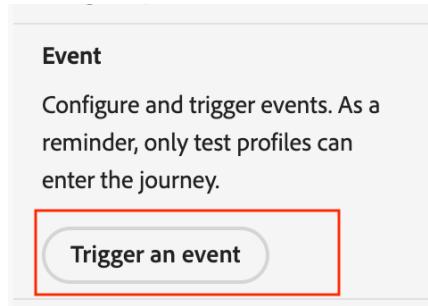

Event
Configure and trigger events. As a reminder, only test profiles can enter the journey.

Trigger an event

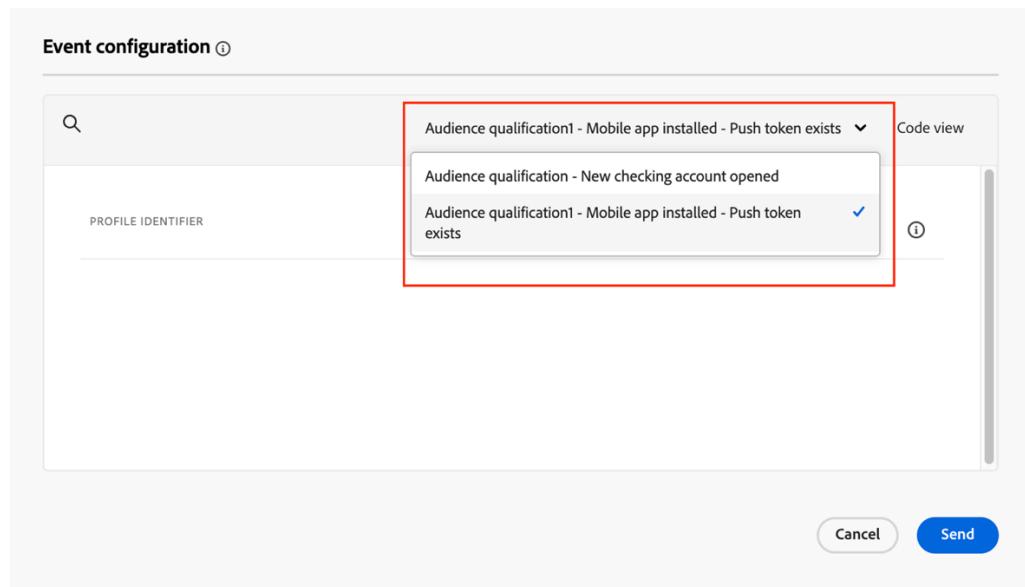

Results
See in the logs the state and the path of test profiles in the journey. Detect also potential errors.

Show log

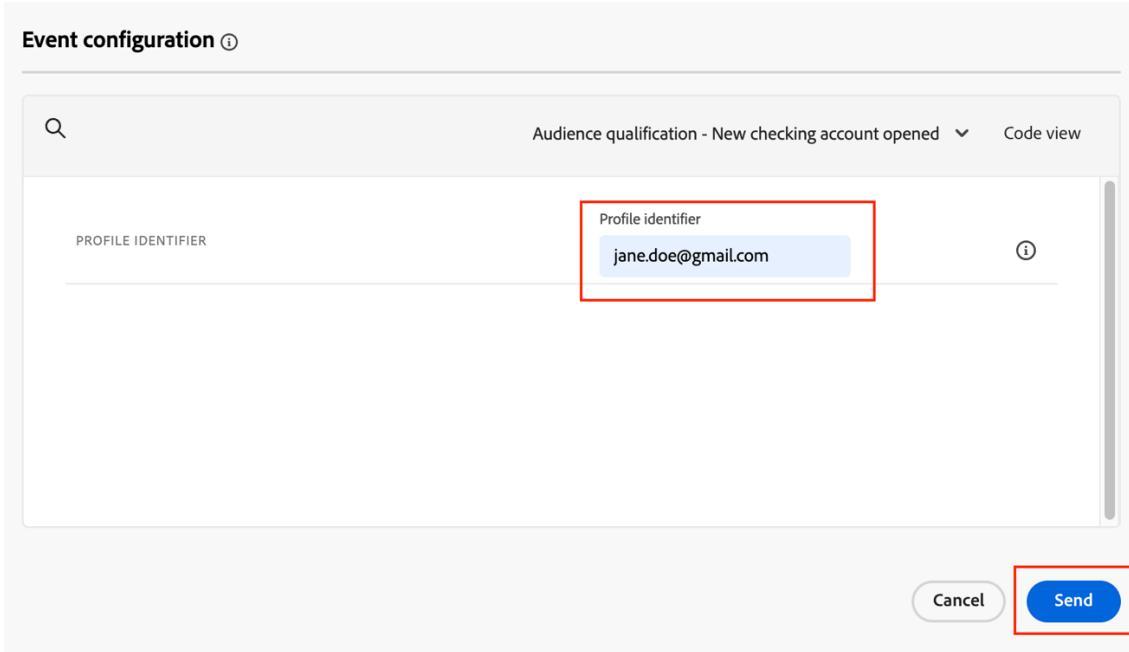

Step 3: Click on the **Trigger an event** button to configure and send events to the journey.

Step 4: When the Event Configuration screen opens, you will see the Event configuration screen open with option to provide profile identifiers for both Audience Qualification nodes.

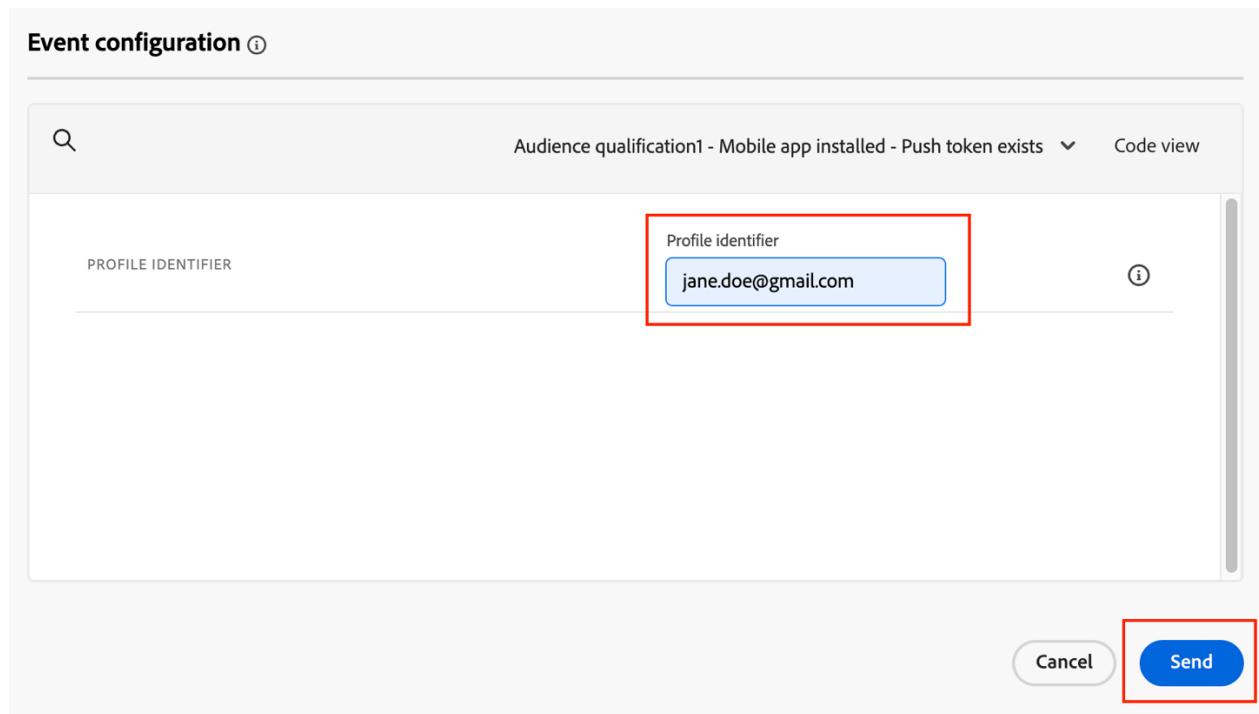

Step 5: Select the first one, in this case **Audience Qualification – New checking account opened** and provide the email id with which you opened the account in first exercise and click on **Send**.

Step 6: You should see an "Event was sent successfully" message and the connectors turn green to show the profile is progressing in the journey.

Step 7: When the line reaches the email/SMS node, check your inbox or phone for the message based on your selected preference. If you had SMS as a preference, then you will receive a message to open the app.

Step 8: Click on Trigger an event again and in Event configuration provide the email for the second Audience Qualification node and click on **Send**.

Result: As the line progresses, you will receive a push notification.

Lesson 6 – Content Cards

Your challenge: You would like to continue the onboarding experience in the mobile app as well, without being intrusive.

The solution: Content cards are a messaging feature in Adobe Journey Optimizer that delivers personalized and engaging content directly within mobile apps and websites. Unlike traditional push notifications, Content Cards integrate seamlessly into the user interface, offering persistent, non-intrusive updates that enhance user interaction and experience.

In this lesson you create a content card in the mobile app as part of the customers welcome experience.

Exercise 6.1 – Set up content card in a campaign

Step 1: Go to Campaigns in left navigation bar of Adobe Journey Optimizer.

Step 2: Click on “Create Campaigns”.

Step 3: Click on “Scheduled-Marketing” campaign type and then click on **Create**.

Step 4: Fill in the details in the campaign form:

1. Provide the name of the campaign (or choose your own) – “Welcome Content Card Campaign – *your seat number*.”
2. Select “Content Cards” from Actions menu and **disable** the toggle for “**Enable additional delivery rules**”
3. Select “**SecurFinancial-Content-Card-In-App**” from Content card configuration
4. Under Audience section, click on **Select Audience** and choose audience with name “Seat Number <*your seat number*>.”
5. Then click on “**Edit content**”.

The screenshot shows the 'Properties' tab of a campaign form. Step 1 highlights the 'Name' field containing 'Welcome Content Card Campaign - 999'. Step 2 highlights the 'Content Card' action configuration, which includes the 'Action name' 'Content card-20250307131523' and 'Content card configuration' set to 'SecurFinancial-Content-Card-In-App'. Step 3 highlights the 'Edit content' button. Step 4 highlights the 'Audience' section with the message 'Campaign will be activated for Seat Number 999' and the 'Replace audience' button. Step 5 highlights the 'Edit content' button again.

Step 5: After clicking on "Edit Content", the content editor will open

1. Under **Title** you can paste the following text or choose your own:

"Welcome to SecurFinancial!"

2. Under **Body** you can paste the following text or choose your own:

"Thank you for downloading the app. You can find ATMs, track your spending and more. All within the app."

3. Under **Media URL** provide this link for the logo:

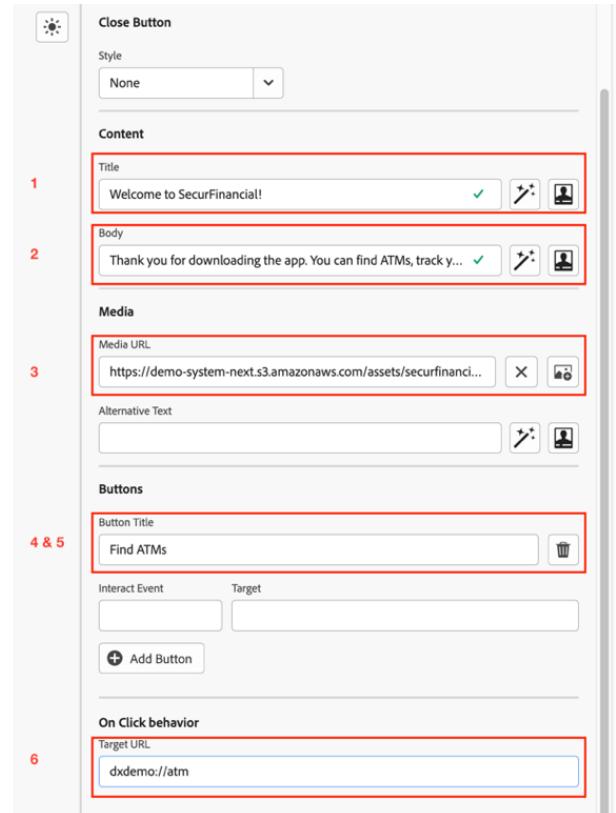

<https://demo-system-next.s3.amazonaws.com/assets/securfinancial/home-loan.jpg>

4. Click on **Add Button**.

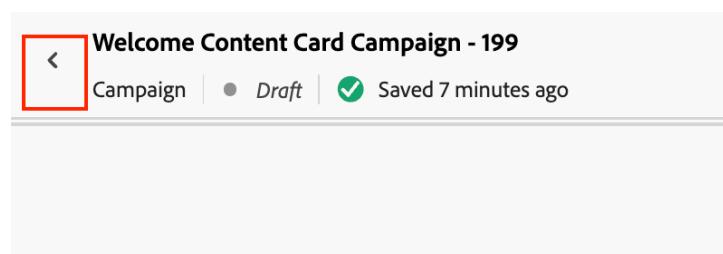

5. Under **Button Title** paste the text "*Find ATMs*".

6. Under **Target URL** under **On Click behavior**, please provide this URL:

dxdemo://atm

Step 6: Click on back arrow and go back to main form.

Step 7: Click on **Review to activate**.

Properties * Required

Name *

Welcome Content Card Campaign - 199

Description

Add description...

Manage access Review to activate Duplicate

Step 8: Click on **Activate**.

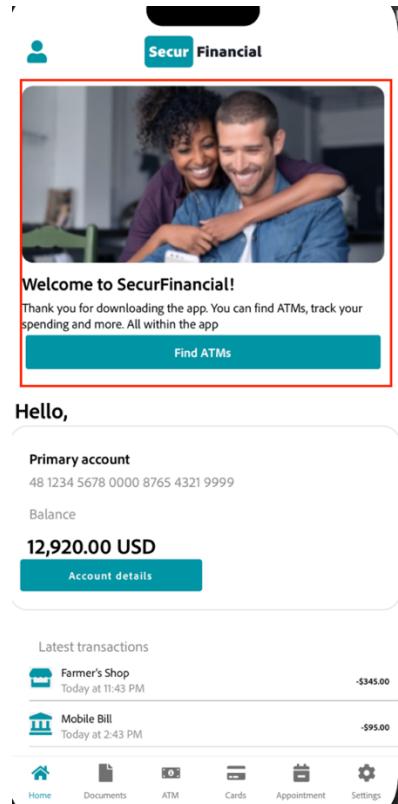

Properties

Manage access Simulate content Duplicate Activate

Step 9: Now the campaign is activating. Wait for the campaign status to **Live**.

Step 10: Once the campaign is Live, go to the app – make sure you are logged in with the email id with which you have created the account.

Result: Now when you go the **Home** page of the app, you see the content card activated.
You might have to refresh the page, by swiping down!

Congratulations, you have completed all exercises!

See the **Additional Resources** section for video tutorials on the topics we covered in this lab.
